SHERMAN CONSTRUCTION CO.

Dear Mr. Sherman:

It was a pleasure working with you and your company on the James F. Byrnes High School Football Field House project. With the success of this new facility, your company obviously has a lot of very qualified and dedicated people. The coordination of sub-contractors, supervision on a daily basis and quality control were superior. Also obvious was the ever present "air" for the overall safety and concern for employees. You should be very proud in that your company was a big part of making James F. Byrnes High School Football Field House an excellent facility for our athletics. It is a show place for our community and will serve our athletics for many years.

Most noted was my relationship with Allen Sherman and Keever Westmoreland. Allen, as Project Manager, was continuously involved to insure on site products and supplies were available as needed. As time went on he also had a number of recommendations that would enhance the facility and save the school district money. Allen the sub project managers and architect often collaborated to enhance the facility with changes that were beneficial to the district and contractors.

Keever was a superb job superintendent and site manager. He was on top of things being done by Sherman employees as well as sub-contractors. He insured the work on site was well coordinated and things executed in a safe manner. He was truly a team player. It was a pleasure working with him. He stayed on top of the job and coordinated with his subs in a very professional manner. It was a pleasure to work with him and all of the Sherman Team. It would be my pleasure to work with him on future projects anytime. He was mild mannered in dealing with people but forceful in the execution of his duties relating to our project.

Thank you for allowing us to work and learn from your company.

Sincerely,

Sammy F. Betsill
Project Manager – New Construction
