Mr. Andy Sherman
Vice President
Sherman Construction Co. Inc.

Dear Mr. Sherman:

I would like to thank you for your excellent service during design and construction of our design-build indoor training facility for athletics. Your knowledge from previous experience was especially valuable during design and preconstruction as we put together a plan for the mechanical system both now and in the future as well as the process and procedure for installing an artificial turf field and the logistics that are required to coordinate that with the other interior finishes and the exterior finishes.

With your help along with the other team members, this project has been one of if not the smoothest projects for athletics at Virginia Tech. It was turned over early, under budget, with zero contractor driven change orders and is a magnificently beautiful building, which we consider to be the best, not just in the ACC, but in the country.

In the future, should you ever need a reference, please don't hesitate to share my name and contact information. I'm happy to share how pleased we were with this overall process and the excellent results to date.

All the best,

David Chinn
Virginia Tech Project Manager
